Putting Fundamentals: The Business Closer's Stroke

Key Concepts Covered

- Start with a balanced stance-feet shoulder-width apart, eyes directly over or just inside the ball.
- Grip the putter lightly-you're guiding the stroke, not swinging forcefully.
- Align the putter face square to your target. Your shoulders, hips, and feet should be parallel to your target line.
- Think of your setup like railroad tracks-one track is your stance, the other is the ball's path.
- Keep your stroke smooth and pendulum-like. Let the shoulders move the club-hands stay quiet.
- Focus on consistent tempo back and through-no wrist flicks, no stabs.
- Distance control matters more than perfect aim. Learn to feel speed on different length putts.

Pro Tips

- Three-putts kill momentum-and conversation. Prioritize lag putting over sinking everything.
- Finesse beats force. A calm, confident stroke sends a message beyond the scorecard.
- Putting isn't just a skill-it's a separator. Master it, and you'll stand out on and off the green.
