# Putting Green Etiquette: Don't Step on Toes

## Key Concepts Covered

- The putting green is often called 'the dance floor'-treat it with care and respect.
- Never step in another player's line of putt (the imaginary line between their ball and the hole).
- Always mark your ball carefully, without disturbing others' putting lines.
- Stay quiet and avoid all movement while others are putting-distractions can ruin the moment.
- If you're the experienced golfer, show grace-never scold a beginner for etiquette missteps.

## Pro Tips

- Think of the green as a boardroom-how you carry yourself matters more than how well you play.
- If you're unsure, ask before stepping-it's better to seem cautious than careless.
- Lead with class. People won't remember your score-but they will remember how you acted.
